

VIZZARD HAD A BIG JOB

Union Pacific Special Agent Tells His Experience with the Bandits.

FIGHTING AGAINST SMOKELESS POWDER

Getting Provisions Out of the Town of Casper to the Pursuing Parties Not the Smallest Part of the Work.

John G. Vizzard, special agent for the Union Pacific, has returned from Casper, Wyo., where he was engaged for a week in fighting against the bandits who recently held up the Union Pacific mail train. He superintended the work for a week and then turned it over to other agents of the company and returned to headquarters to give his attention to office business, which had been accumulating.

"It was the first experience of this kind I ever had," said Mr. Vizzard, "and I am not anxious for any more. I never saw such a country as that through which the bandits made their way after holding up the train. One may drive there for 100 miles and never see a human being. When you reach the mountains it is foolish for anyone to attempt to go through them except he is thoroughly familiar with all the trails and footpaths. Only the cowboys and ranchmen are fitted to successfully pursue such a search.

"The only horses out there which one can use are the bronchos, and they will not go through the mountains except he is thoroughly familiar with all the trails and footpaths. Only the cowboys and ranchmen are fitted to successfully pursue such a search.

"The only horses out there which one can use are the bronchos, and they will not go through the mountains except he is thoroughly familiar with all the trails and footpaths. Only the cowboys and ranchmen are fitted to successfully pursue such a search.

Use Smokeless Powder.

"The bandits are supplied with smokeless powder, and in these canyons it is next to impossible to locate them. When they fired at their pursuers no one could tell from whence the report came. There was no smoke to guide and the echo confused the most expert hunter. When they wounded the sheriff they took advantage of the confusion which naturally followed, and moved further into the mountains. The posse captured the horse belonging to the outlaw, which carried 300 rounds of ammunition. This was important and weakened their resisting power to a considerable degree.

"There is no question in my mind but that we are on the right track. I do not believe there is any doubt but that eventually we will capture the party, dead or alive. Every sheriff in that part of Wyoming, accompanied by a strong posse, is in pursuit, and the United States marshal, with a large force of deputies, is following them. It seems that it will be impossible for the men to escape, although it may take some time yet before they are captured."

HEADQUARTERS GO TO ST. LOUIS.

Pacific Express Company Will Get Newer and Better Action.

While not yet definitely settled, it is altogether probable that the headquarters of the Pacific Express company will next fall be moved to St. Louis. Since the organization of the company under the laws of Nebraska many years ago, the headquarters have been in Omaha, and the five-story stone and brick building at the corner of Fourteenth and Harney streets has been the hub from which the company's business has radiated. The reason given for the proposed change is that at St. Louis it will be more convenient to handle the increasing business of the company.

The auditing and treasury departments will be the first to go, with the traffic department possibly following soon after. The operating department and the president's office will remain here, the company's charter requiring that the president shall maintain his office in Omaha. As a matter of fact, the entire headquarters were to be moved and Omaha will become only an important sub-station in the system, with the business west of the Missouri river operated from this point. Mr. Eggleston, the president, will nominally have his office in the company's building here, and the annual meetings of the stockholders will be held here, but the president will spend most of his time in St. Louis and will direct the affairs of the company from that city. The operating department will be in charge of F. G. Gentsch, who was recently brought here from Salt Lake City and made general superintendent, a position which did not exist previously. His jurisdiction extends from Omaha west. Mr. Eggleston, speaking of the changes contemplated, said:

"It is not settled that any portion of the business of the company will move to St. Louis, but it is probable that such will be the case. The ultimate decision depends upon our ability to acquire suitable accommodations in property which we own in that city. Architects are at work making plans, and upon their report the final decision will be made. If it is decided to move, the change will take place sometime next fall.

"The only reason which actuates the removal of the headquarters is that St. Louis is a more convenient point for the transaction of our business. Three-fourths of our traffic is east and south of St. Louis, and what there is in the west can almost as easily be handled from that point as from Omaha. The future for us as it appears to-day is in the east. We have recently acquired two more lines in Ohio, and all our efforts just now are directed to enlarging our field in the east. We now control lines to Buffalo, N. Y., and hope soon to have a line into New York city. The Iron Mountain road opens a large field for us in the south. These conditions make it almost imperative that we should have headquarters in a city more directly having supervision of the larger portion of our business.

"The removals we contemplate making will affect about one-half the business transacted at the present time, but as to the number of employees it will show a larger per cent. It will be hard for many of these to make the change. They have been with us for years, and some of them have their homes here. Everyone has been given an opportunity to go, however, and those who wish will be transferred to St. Louis with the office."

Pennsylvania Annual Meeting. PITTSBURG, June 12.—The annual meeting of stockholders of the Pennsylvania company, which was adjourned from June 6, was held in this city today. The annual report for the year 1898 was submitted by the operations of the Pennsylvania company, the proprietary department and its north-west system of railroads, about 1,075 miles in length.

The results in the proprietary departments were as follows: Total income, \$2,040,979, out of which there was paid for interest on bonds, etc., \$1,378,463, leaving a net profit for the year of \$662,516, a decrease as compared with 1897 of \$237,316. There was an increase in tonnage on all lines of 3,996,173 tons, but the rates were materially reduced.

MAGNIFICENT TRAINS. Omaha to Chicago. The Chicago, Milwaukee & St. Paul railway has just placed in service two magnificent electric lighted trains between Omaha and Chicago, leaving Omaha daily at 6:45 p. m., arriving at Chicago at 8:25 a. m., and leaving Chicago at 6:15 p. m. and arriving at Omaha at 8:20 a. m. Each train is lighted thoroughly by electricity, has buffet smoking cars, dining room, sleeping cars, dining cars and reclining chair cars and runs over the shortest line and smoothest roadbed between the two cities.

Teachers. And others who intend taking advantage of the low excursion rates made for the National Educational association meeting at Los Angeles in July should avail themselves of the opportunity of traveling at least in one direction through Colorado and the Rocky mountains, famous the world over for their magnificent scenery. The Denver and Rio Grande railroad, "The Scenic Line of the World," is the most popular route through Colorado en route to the Pacific coast. The rate to Los Angeles and return via this route is the same as by way of all others—one lowest first-class fare plus \$2.00 for the round trip.

THE HERRICK. CIRCULATION. IN A REFRIGERATOR is good or bad, irrespective of the lining used. A majority of refrigerators are zinc, because on account of imperfect circulation they would become wet without it, and the use of zinc in such cases simply keeps the moisture in the food chamber, decomposing the foods and producing disease. The circulation of the Herrick is so perfect that moisture cannot be produced in the food chamber—hence the use of zinc would not only be useless, but would be a detriment.

PERFECT CIRCULATION. We sell this. Squires & Smith, Gen'l Agents. The only exclusive refrigerator house in the west. See our line. Telephone 1695. 1614 Capitol Ave.

Signs of Summer. To the observant mind the approach of the different seasons is as plainly indicated by the daily newspaper as by the face of Nature itself. Taking up your morning paper, the now familiar admonition, "Keep cool, drink Hires' Rootbeer," suggests to you as plainly as do the balmy breezes and blossoming trees, the advent of the summer season. You unconsciously associate this popular beverage with hot weather, and would almost as soon expect some breach of conduct on the part of old Nature herself as to miss the familiar name of this sparkling drink which is known and used by all classes throughout the land.

LADIES' and CHILDREN'S SHOES SHINED FREE THIS WEEK. Boston Store J. L. Brandeis & Sons, Props. OMAHA. The little women cannot begin too early to know the very best of shoe leather; the softest, easiest, most pliable and most lasting shoe leather. That is precisely the kind they want for their dolls. Nothing is too good for dolls.

And we have arranged to give every girl in Omaha, who is accompanied by a parent, brings her doll to the store on Saturday, a pair of genuine "Vici Kid" slippers for the little play-child's feet. No matter how big the doll or how little, we have a pair of slippers ready for its feet.

Do you wonder why we give away dolls' slippers of real Vici Kid—the best and costliest kind that goes into shoes? Of course you do. Something for nothing isn't the usual way. It isn't the way with these Vici Kid Slippers, either. There is but one genuine Vici Kid. Mr. Robert H. Foerderer produced that kid and named it. There are many imitations. We want every girl and every woman to know exactly what the genuine Vici Kid looks like and feels like. Then the men will all know, too. And so we make these dolls' slippers, knowing well that in her play-talk dolls will tell how soft and easy they are, and the little girl and all the house will see how handsome and tough they are—what a perfect shoe leather they are made of. This will make them all ask for Vici Kid shoes for themselves, and make them insist upon getting the genuine.

THAT is why these dainty slippers are so gladly given away; they carry the story and the FACT of Vici Kid into every house they enter. Bring the dolly, big or little. If we haven't a fit ready for her, we'll make the slippers to order. During this week we have ladies' made at our store teaching shoe care by proper dressing. It means better wear, better looks, better satisfaction from shoes—money in one's pocket.
